

Indexable Milling #dapra

Dapra Milling Solutions Perfect Parts for Vending

“Make employees aware, and accountable for, the amount of corporate resources consumed.

Limit the amount of capital tied up in worker-related inventory.” thestreet.com

Inserts, one of the best applications

Intelligent systems are especially critical in managing the consumable inserts.

Leveraging these systems you can apply job numbers and an estimated **Indexable Insert** usage for the job. If an operator struggles and uses excessive inserts, you know right away, not weeks later.

Dapra is further refining packaging for the use of our carbide inserts in vending.

- ◆ Protect the inserts from damage through the use of individual foam packages
- ◆ Facilitate the separation of inserts with breakaway plastic connectors/gates
- ◆ Provide individual pack labels, so that inserts identifiable, after separation.
